FiberOptic Resale Introduces LC SOCs - Splice-On Connectors For The EZ7 EasySplicer

FiberOptic Resale has just introduced an upgrade with some new features and improvements including the availability of LC SOCs which is important for data centers and high speed networks. Upgrades include long life electrodes (5000 fuses) and a higher temperature oven that can shrink SOC sleeves better. A upgraded cleaver now includes a fiber trash bin to keep fiber shards off the workbench. And software updates provide better functionality.

LC Splice-on Connectors
Now available for use with the EZ Splicer
